01 — BIOGRAPHY

ABOUT PROD

PROD is a Valencia-born DJ and producer whose musical journey began in Hip Hop culture in 2017, gradually evolving towards a sound focused on Tech House and House. His first productions were released in 2022 and 2023 through Siena, the label founded by DISAIA, and FSI, the label founded by Javi Colina. These releases gained recognition on Beatport, securing positions in its Tech House and new release charts.

Following this initial period, PROD decided to focus his efforts on refining his sound and developing a distinctive musical identity, continuously working on and improving his production techniques. This evolution has led him to develop a more mature, defined and personal sound, supported by international artists such as Dennis Cruz, Josh Baker, Joseph Capriati, Franky Rizardo and Marco Carola, among others.

His artistic evolution has also taken him to renowned venues such as Marina Beach Club, Razzmatazz and Spook. PROD continues to develop his sound and prepare new releases, further establishing an artistic direction that reflects both his musical evolution and his vision of House and Tech House.
